k. **Description of Request:** The licensee requests Commission approval to grant the Joint Municipal Water and Sewer Commission (JMWSC) permission to use project lands and water within the project boundary on Lake Murray for the construction and operation of a component of a raw water intake facility (facility) to provide public drinking water. The component of the facility proposed to be constructed within the project boundary is a single screened 84" intake pipe that would extend from the shoreline of Lake Murray into Lake Murray itself. The remaining components of the facility would be constructed outside of the project boundary. Once constructed and operational, the facility would initially withdraw 10 million gallons per day (MGD) from Lake Murray. Subsequently, JMWSC would increase withdrawals made by the facility in 10 MGD increments over time, as needed, up to a maximum of 50 MGD, as water demands dictate.
